

MAC address and type of the network adapter

Click on Start/All Programs/Accessories/Command prompt.

Type **ipconfig /all** and press OK.

Read the information in the next window.

Note that the Physical address is MAC address.

Description is the Type of the network adapter.

Dear Students, it is very **Important** to obtain the MAC address of **Ethernet adapter Local Area Connection**, not MAC address of **Ethernet adapter Wireless Network Connection!!!**

If you make this mistake, this will delay connecting your computer to the AUBG network because the connecting procedure need to start again.

On the screenshot below you can see that the right MAC you need is **00-15-60-BC-9F-61** (for Ethernet adapter Local Area Connection) and the other one is **00-16-6F-7C-FB- 95** (for Ethernet adapter Wireless Network Connection).

```
H:\>ipconfig /all

Windows IP Configuration

    Host Name . . . . . : CCA0310
    Primary Dns Suffix . . . . . : aubgin.local
    Node Type . . . . . : Mixed
    IP Routing Enabled. . . . . : No
